

MAIN FEATURES

The winning operational capabilities of a traditional telehandler in a fully **green version**.

Maximum load capacity: 2000 kg

Maximum lift height: 4350 mm

Maximum speed: 20 km/h

Unladen weight: 4400 kg

3 steering modes: front, crab, and concentric

Optimized transmission to **minimize energy waste**.

Low Noise Pump: minimal vibrations and noise.

Advanced Adaptive Load Sensing System: energy savings and longer battery life.

Electronically controlled **Flow Sharing** distributor as standard.

SMART

THE FULL ELECTRIC MINI TELEHANDLER

DIECI

SMART

Dieci's innovation continues to grow, bringing to the market the new **100% electric telehandlers: Mini Agri-e SMART and Apollo-e SMART.**

Maneuverability, versatility, and cost-effectiveness meet the advantages of electric power, allowing efficient operation in any working condition.

Compact, agile, and high-performing telehandlers, ideal for indoor use, urban areas, greenhouses, or **environmentally restricted zones**.

FULL ELECTRIC

MOTOR

19 kW (S2 60)
Traction motor power

22 kW (S3)
Hydraulic system motor power

RECHARGING SYSTEM

3 charging sockets as standard, all connected to the onboard battery charger system:

Mode 3 Type 2 (for charging columns)
220V industrial socket
380-400V industrial socket

Positioned in **fully accessible** locations on the vehicle, the 3 sockets **recharge when the bonnet is closed**, for greater operator safety and to prevent vandalism. The vehicle is also designed to be connected to various types of external rapid battery chargers.

EXTERNAL FAST CHARGERS

BATTERY

Standard Battery

Lithium - LiFePo4

QUICK REPLACEMENT SYSTEM
BATTERY THERMAL MANAGEMENT
REGENERATIVE BRAKING

ECE R100 approved battery

SAFE AND VERSATILE

- **Electrical system voltage up to 96V** for high performance without safety limitations.
- **Automatic equipment recognition**
- **Anti-tipping system:** aggravating movements blocked in the event of overload
- **Compact size and functional design:** spacious cab, controls, and information always accessible to the operator

Supplementary bioethanol **HEATER KIT**

SPECIAL NON-MARKING TIRES, for indoor uses

ELECTRIC TECHNOLOGY

Thanks to advanced technological solutions, the **electric telehandler** offers significant operational benefits:

- No service or diesel filters to replace
- Easy and quick battery change
- Low noise levels
- No usage limitations

ZERO EMISSIONS

LOW MAINTENANCE

NO COMPROMISES
